WORK HISTORY

- 2019 - present **Software Engineer**
KuveytTurk Participation Bank
Debit / Credit Card System
- Sep 2019 **Systems Engineer**
Dec 2019 KuveytTurk Participation Bank
Datacenter Support and Virtualization
- 2019 (summer) **Internship**
Visiobit Information Technologies
HTML Component Creator and Communicating via C# Using Nancy Framework on the backend
- 2016 (summer) **Internship**
SVS Telecom. and Satellite Systems Inc.
Java-Focused GUI Development and Software Testing

EDUCATION

- 2019 **Gebze Technical University**
Computer Engineering

AWARDS

- 2017 **InnoveraLabs — Java Programming Competition**
2nd prize – Fight 4j v2
- 2011 **TUBITAK Project Competition Among Regions of Turkey**
2nd prize in Mediterranean Region - Chemistry

LANGUAGES

- **Turkish**
Mother Tongue
- **English**
Conversational
YDS - 2019: 81,25

PROGRAMMING SKILLS

- **Fluent:** C#, Java SE, C
- **Intermediate:** Python
- **Basic:** MySQL

PROJECTS

- **Raspberry PI-based Internet Radio (Individual)**

It is my one of mandatory undergraduate projects in which radio stations being able to stream over IP/URL can be listened. — git.io/fprge

- **Home Price Prediction by Machine Learning (Individual)**

It is my second-individual-project in which I carry out linear-regression algorithm with a tool called as Orange. The data to be trained is obtained with my hands(!) with some techniques i.e. web-scraping.

- **ESP32-based Smart Wristband (Collaborative)**

The group project in which I was the part of ESP32's communication, connection with other components like sensors, and JSON string transmission was productized in May,2019. — bit.ly/smartwrist

- **RFAA Device Control Software (Individual)**

I developed the GUI during my internship. It controls antenna in ways up and down etc. Besides that, it can connect the devices with TCP protocol. (IP:Port). — git.io/fprgl

- **Backgammon Game (Collaborative)**

It is a game known as Backgammon played with two persons. The game was developed as a group project. Throwing and checking dice part were developed and some step issues were fixed by me. — git.io/fprgJ

- Other projects and coursework are available on my Github.

INTERESTS AND HOBBIES

- I enjoy watching movies throwing me a curve.
- I play table and court tennis at odd moments.
